Product End of Life Instructions

Smart-UPS Battery Systems

Potential disassembly risks

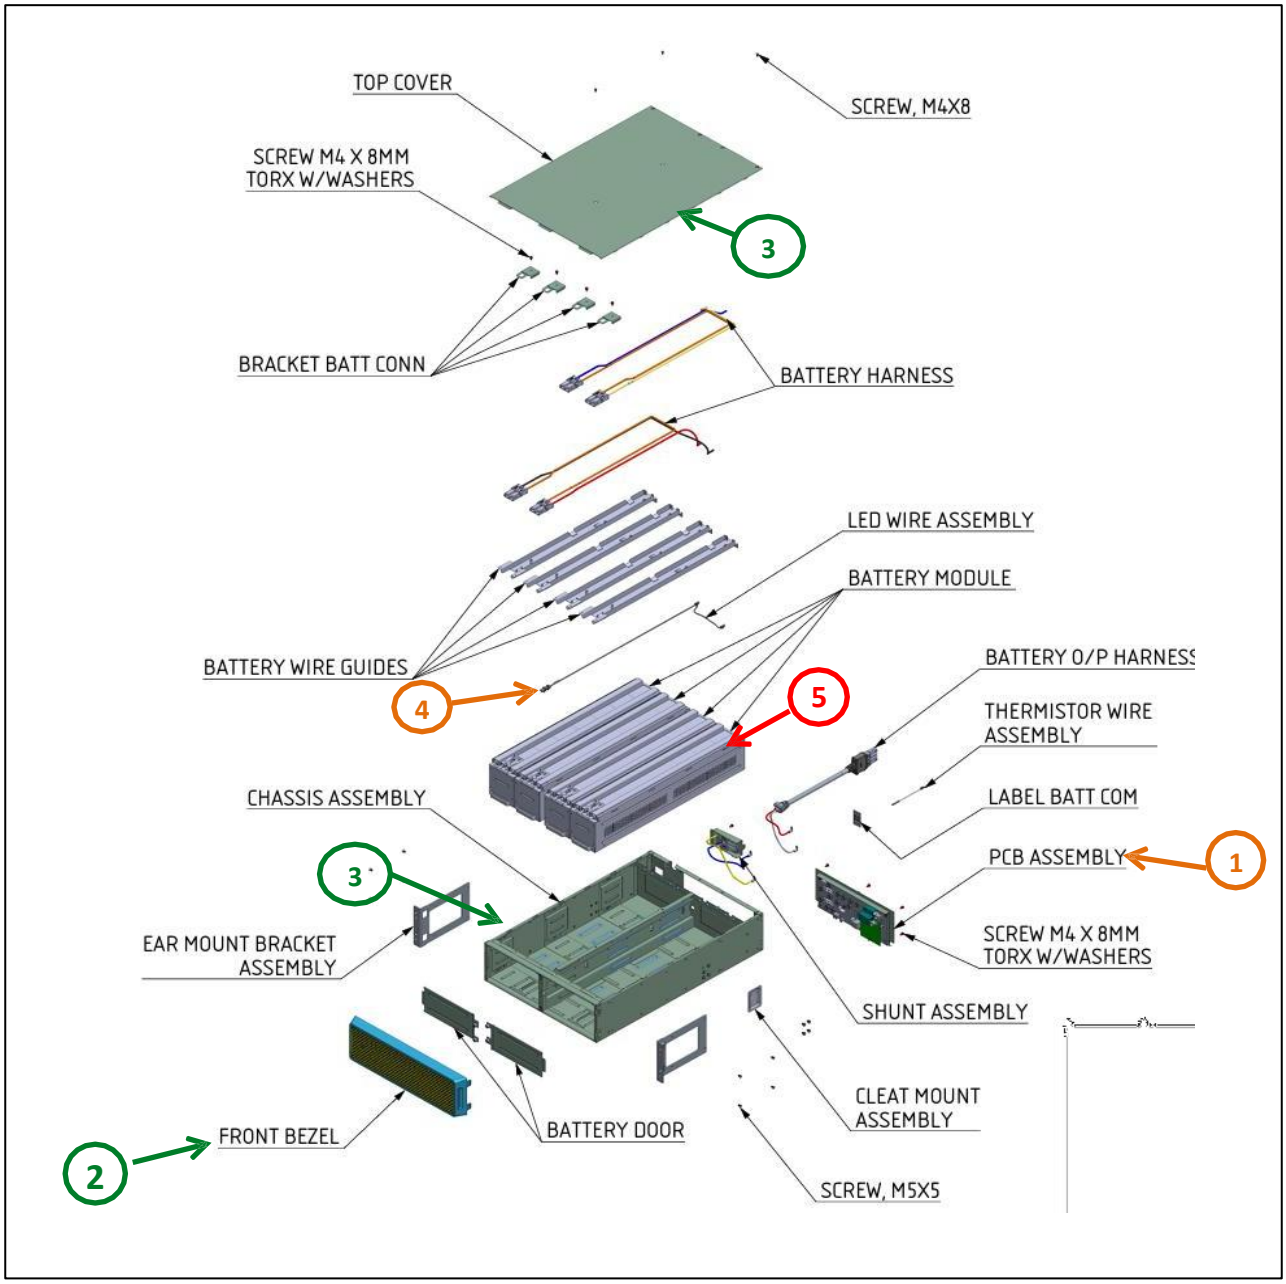

⚠ WARNING

HAZARD OF ARC FLASH OR FIRE

- Disconnect battery terminals before disassembly
- Avoid any electrical connection between the terminals

Failure to follow these instructions can result in death or serious injury.

End of Life Instructions

Recommendation	Number on drawing	Component / Material	Weight (in g)	Comment
To be depolluted	1	Electronic Communication Board	742	3 X PCBA > 10 cm2
To be depolluted	2	ABS with brominates flame retardants	286.6	Plastics with brominates flame
To be depolluted	3	Metal	22899	Chassis, Battery box etc
To be depolluted	4	Cable	17589	
Potential hazards	5	Batteries	60800	Lead acid battery
To be depolluted	6	Others	4001.4	

Product description

Manufacturer identification	Schneider Electric Industries SAS
Brand name	APC
Product function	The Smart-UPS Battery Systems provides, additional back up power (time) to Smart-UPS for servers, voice / data networks, medical labs, and light industrial applications.
Product reference	SRT192BP
Additional similar product references	Not Applicable
Total representative product mass	91000 g
Representative product dimensions	130mm × 432mm × 683mm
Accessories	None
Date of information release	2026-10

Additional information

Legal information		This product family is in the scope of European Union directive 2012/19/EU on Waste Electrical and Electronic Equipment (WEEE). The product family must be disposed according to the legislation of the country. This document is intended for use by end of life recyclers or treatment facilities. It provides the basic information to assure an appropriate end of life treatment for the components and materials of the product.
In case of special transportation: transportation method		The battery pack used in this product range contains lead acid batteries that are regulated as Dangerous Goods shipping must be performed in accordance with the appropriate transportation regulations
Recyclability potential	**78%**	The recyclability rate was calculated from the recycling rates of each material making up the product based on REEECY'LAB tool developed by Ecosystem, for components/materials not covered by the tool, data from the EIME database and the related PSR was taken. If no data was found a conservative assumption was used (0% recyclability).
