

CCAS-P-650

adjustable shelf 19" 1U, depth 650-825 mm, 4-point

Adjustable shelf, fixed at four points. Dedicated for installation in 19" RACK 19" series CCSS (standing) and CCSW (hanging) cabinets. With its help, inside the cabinet you can mount devices that do not have a housing that fits the RACK profile. The four-point construction increases the load capacity of the shelf. Adjustment of the shelf from 650 to 825 mm is carried out with screws (adjustment is not smooth).
